Hello Mountain View Families,

Just sharing some of the continued hard work happening around here. Please make note of the upcoming dates on the calendar. One of our continued focuses is to teach numeracy but to ensure our students can articulate their knowledge using what is called Tier Two Vocabulary. In short, you are only as smart as what you can articulate. Communication is one of the Core Competencies we focus on. Implicitly teaching the vocabulary words helps us get there quickly. Students have been entering a draw by sharing their math with us at the office. We draw two names weekly for a chance to exchange their Math with Mrs. Moss' store items.

The Parent Advisory has purchased a picnic table for the school. Seating on the playground has come up a lot so hopefully this is a start to making the playground more comfortable for the supervising adults. Hopefully there comes a time for gathering of families soon. Take good care, Mrs. Moss-Principal

---

## *On the Calendar*

**People Who Have Made a Difference**

This is Malala.

She believes that all kids deserve to  
go to school girls and boys

she is from Pakistan and now lives

Doctor

Doctors help people  
stay healthy

There are many  
different types of  
doctors

A pediatrician is a  
doctor who spe-  
cializes in the  
care of children
