

Hello Mustang Family,

10/15/2020

Just thought it was time to share some of the learning happening in the building. Here are some of our new Kindergarten recruits

receiving their Celebration of Learning Socks and their certificates.

This celebration happens every month in each classroom with the idea that all students are recognized for their hard work by the end of the year.

On the Calendar:

October 20th - Picture Day

October 23rd - Professional Day (School not in session)

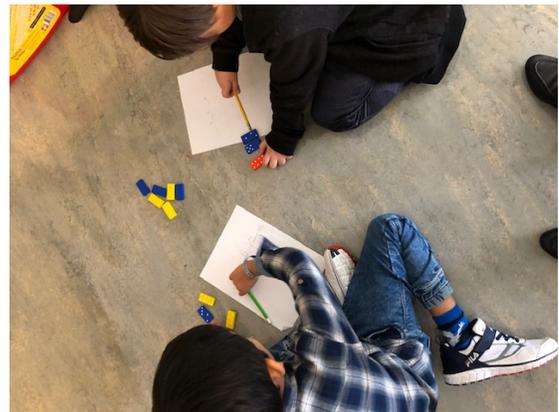

October 28th - Informal Reporting Day

October 30th - Halloween at school and Celebration of Learning

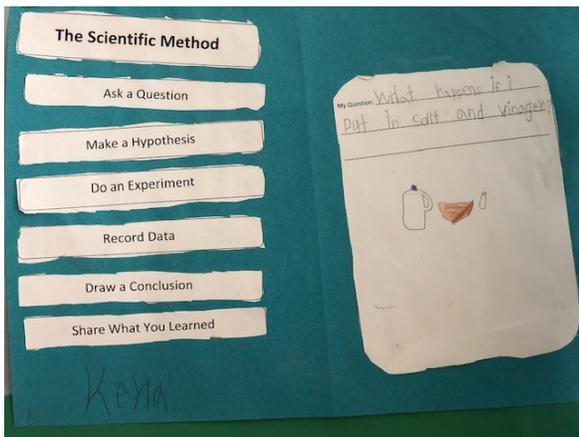

To the right, we have some students in grade two using Math Manipulatives (Dominoes) to build their own

numeracy stories and equations. We had our Orange

Shirt Day on September 30th. Many of the students came in with knowledge which tells us you are having some very important conversations with them in the home. Here's a Science sample from one our students. They were asked to follow the Scientific Method and "Think like a Scientist". The students came up with some great questions to explore. Our Kindergarten/Grade One class showed Dr. Bonnie Henry some appreciation and respect by creating this visual reminder for all staff and students.

Here's a picture of our little gardeners. It's amazing to sit and listen to their conversations as they learn new concepts together. We are going to keep forging ahead as themes come up that are important learning opportunities for students. We went ahead with the Terry Fox Run class by class which felt a little different, but we did it thanks to your support.

I am extremely grateful for our community and for your diligence with the [Daily Health Check](#). This keeps us all safe.

Please also remember to clear off the playground at the end of the day. We are working hard to keep our Learning Groups apart in the building and we have limited our Learning Groups at recess and Lunch. I would like to end off with a student response to a writing prompt which made my day so I hope it will make yours too.

Mr. Maguire asked the students to respond in their journal- "If you had a choice, would you want to live in the past or the future?".

Student- "I would live in the past and ask Albert Einstein to find a cure for Covid-19 and he would save the world". Ah... to be young again!

Thank you for trusting us with your kids! We think the world of them. Stay safe!

Mrs. Moss- Lucky to be Principal at Mountain View
