JUNIOR LEGO ROBOTICS!
PROVIDED BY ROBOKIDS

As children, we all hope and pray our toys would come alive and start moving. This winter, Robokids instructors will teach students how to give Lego a life of its own using Lego robotics!

Students build new projects every week like: a buzzing dragonfly, the airplane with spinning propellers, self-driving racer cars, a dancing horse, and much more. Over 7 weeks, the class will build, learn from, and play games with projects equipped with simple mechanical systems. Gears, motors, axles, and pulleys are all put on clear display, and at each student's fingertips! Ignite the passion for creating at an early age with Lego Robotics. No experience necessary!

LEGO ROBOTICS!
PROVIDED BY ROBOKIDS

Solve Challenges and Play Games with Lego Mindstorms!
Every class, beginner and experienced students alike will step into the world of robotics through project building on Lego Mindstorms. With a new theme and project every week, learning the fundamentals of mechanical systems will be fun but serious work.

Students test and observe how parts of their project function together as a whole, then make changes to their project based on these observations. Each week will also involve experimenting with different combinations of gears, axles, and levers to make improvements to projects. Regardless of experience, students will grow the range of robotics projects they can proudly say they've built starting with the top-launcher, radar detector, and mouse trap.

Accomplished builders: if you think you're up to the challenge, join the weekly class-wide games after you've made improvements to your project. Your instructor will be the judge and who knows, you may learn a thing or two about winning robot duels.
Always come to class prepared to: Work Hard, Think Creatively and Work as a Team
