Wi-fi Access for Personal Devices

SD43-S network

The SD43-S SSID covers:

- Personal devices (e.g. BYOD laptops/iPads/tablets, personal cellphones)
- District devices that are not centrally managed (e.g. district iPhones)

Connecting to SD43-S network requires valid SD43 user account. When connecting for the first time, you will be prompted for username and password. On subsequent connection attempts Login steps may not be required, as information is cached in the system for predefined period of time.

Limit for number of devices: Two (2) - you can have your SD43 account active on up to 2 different devices at any one time. Note that recent connections get cached and will not require you to re-login while device information is present in the system.

Connecting from Apple device

Connect to SD43-S network

Important note: you are limited to having your SD43 account active on up to 2 different devices on SD43-S network at any one time.

To connect to SD43-S network, follow these steps:

Go to Settings -> Wi-Fi -> make sure Wi-Fi is enabled and select "SD43-S" from available networks
