#### **Grade 10 students**

The Numeracy and Literacy assessments are a graduation requirement. This year, all Grade 10s will write both assessments. They will write the Numeracy assessment in the quarter they have Math 10 (Workplace Math 10 or Foundations of Math and Pre-Calculus 10) and the Literacy Assessment in the quarter they have English 10 (Literary Studies 10, New Media 10 or Creative Writing 10). This will mean that some students will write both assessments in the same quarter.

The assessments are administered from November 2-6 for Quarter One. These dates are set by the Ministry of Education.

For safety reasons, students are required to write in the session to which they are assigned.

#### **Grade 11 students**

Grade 11 students wrote the Numeracy and Literacy assessments last year. If they did not write last year or wish to re-write the assessment, they will be able to register for the January session. The registration link will be provided in early December.

#### **Grade 12 students**

Grade 12 students are NOT required to write the Literacy 10 assessment. On their transcript they will see Literacy 10 – XMT (meaning it is exempt). They are required to write Numeracy 10 to graduate. Most grade 12 students have already written this assessment. If a student wishes to re-write the assessment, they will be able to register for the January session. The registration link will be provided in early December.

\*\*Grade 12 students who have not yet written the Numeracy 10 assessment will automatically be registered to write in the November session. They will receive an email to their 125-school email account with the day, time and location of the assessment.

Please bring the following to the assessment:

- Pen/Pencil and eraser
- Your Provincial Education Number (this is a 9-digit number located on your MyED account or a report card)
- Picture Identification
- OPTIONAL: A basic scientific calculator for the Numeracy Assessment. An online calculator is provided within the assessment if needed

**November 2020 Schedule:**

	Monday	Tuesday	Wednesday	Thursday	Friday
November	2	3	4	5	6
8:30-11:30 1A classes	Mr. Clayton ½ the class  Foundations of Math & Pre- Calculus 10  In the Library Lab	Mr. Clayton ½ the class  Foundations of Math & Pre- Calculus 10  In the Library Lab	Grade 12s  **Gr. 12 students needing the assessment to graduate	Mr. Chung ½ the class  Workplace Math 10  In the Library Lab	Mr. Chung 1/2 the class  Workplace Math 10  In the Library Lab
