TRANSPORTATION ROBOTICS

By: Bricks4Kidz

Our one hour robotics building classes explore architecture, engineering and technology concepts using LEGO® bricks. Students participate in a 6-week session.

If you like planes, trains and automobiles, then this unit is for you! Each week, students will build motorized models such as a dragster, an airplane and more. Explore the history of transportation from horse and buggy and trains to the development of the automobile and flight. Lots of building fun ahead with motorized models of a train, car, dragster and airplane. These models rock, roll and spin! Your child can follow our step-by-step model plans to create their vehicle,

CODING AND DESIGN

IN PARTNERSHIP WITH FUSION EDUCATION

This after-school program is aimed at enhancing students' critical and creative thinking and problem solving through coding and design. Through guided and instructed play, students will use the Engineering Design Process (EDP) in conjunction with coding software to create projects including games and solve challenges. By exploring, inquiring, generating ideas and testing them, students will understand EDP is a tool they can apply to all subjects and most situations.
