

Hello,

My name is Becky Jiang. I am a pharmacist and owner of **The Medicine Shoppe Pharmacy** located at **1146-1470 Prairie Avenue in Port Coquitlam, B.C. at Prairie Mall**. My pharmacy has an intimate and friendly setting which allows me to get to know each patient and focus on their health needs.

I have 20 years of pharmacy experience in both community and hospital settings. I have worked in various pharmacy roles including: business owner, community pharmacist, clinical staff pharmacist (Internal Medicine, BC Cancer Agency), as well as a preceptor/practice facilitator for UBC pharmacy students.

I would like to take this opportunity to share some of the products & services I provide.

Professional Grade Supplements

I stock high-quality, therapeutic, evidence-based supplements that are preferred by health care professionals specializing in integrative, naturopathic and functional medicine. The 2 brands I carry (Designs for Health and Ortho Molecular) are committed to the highest quality of care to patients that use their products. I have an interest in Functional Medicine and am currently a member of the Institute of Functional Medicine (IFM). My goal is to become a Functional Medicine Practitioner and am currently taking the live-stream workshops from IFM to reach this goal.

Compression Stocking Therapy

I am a certified Sigvaris Compressions Stockings Fitter. I carry a variety of Sigvaris brand compression stockings for regular use with 15-20mmHg compression. Medical grade Sigvaris compression stockings (>20mmHg) can be ordered in after a proper fitting and prescription from a doctor.

Vaccination Services

I am able to provide vaccinations free of charge for most publicly funded vaccinations (e.g., COVID19 vaccine (when available), flu shots, tetanus, etc.). I also provide other vaccinations for travel and various other conditions (e.g. shingles, Hepatitis A & B, etc.) with direct billing to third party payers for coverage. There will be an injection fee for all private vaccinations. **Note:** Pharmacists can only provide injections for children 5 years and older.

Medication Reviews

I can provide comprehensive medication reviews free of charge or for a fee to patients who may or may not qualify for the BC Publicly Funded Medication Review program. Patients who have complex medication regimen would certainly benefit from this.

Wound Care Management

I currently work closely with a Wound Care Nurse to help patients in the community with acute or chronic wounds using the Cutimed Sorbact Wound Care Line from BSN Medical. Consultations are free of charge.

Free Blister Packaging Service

To improve patient compliance, medications are organized by different times of the day using a specialized blister packaging system called Dispill. Patients are able to remove their doses for certain medications based on the time of day (i.e., breakfast, lunch, supper, bedtime) for ease of convenience.

Feel free to follow me on **Facebook** MedicineShoppePrairieMall or **Instagram** @medshopprairiemall and checkout **Google** to read reviews left by some of my patients.

Please also feel free to reach out to me should you need help with any pharmacy related issues. I will do my best to help.

Sincerely,
Becky Jiang, B.Sc. Pharm, Pharmacist Owner
